1. Course Title

Allied Deployment and Movements System (ADAMS) Advanced User Course (LOGFAS Vs 6.2)

2. Identification Number (ID)

0225

3. Purpose of the Course

To provide military and civilian personnel at NATO, NATO Nation, Partner Nations and Organisations Headquarters with advanced training in the use of the Allied Deployment and Movements System (ADAMS) modules of the Logistic Functional Area Services (LOGFAS) software, to support the analysis, planning and deployment activities of forces.

This will include movements planning, co-ordination, analysis and execution.

The use of the software to support staff work.

4. Learning Objectives

On completion of this course the student will be able to:

- Comprehend and conduct advanced database manipulation of LOGFAS Data.
- Comprehend the advanced procedures applied in the creation of a National Detailed Deployment Plan (DDP) for analysis and planning purposes.
- Carry out complex transport asset allocation, asset sharing and multi leg scheduling.
- Merge and view multiple DDPs to create a Multi-National DDP.
- Create, duplicate and modify Force Sustainment Packages for inclusion in DDPs.
- Understand the principles to create DDP Wizard Templates to split Forces into Movement Components and assign strategic LOCs.
- Understand the principle and data requirements to create DDPs using the DDP Wizard and Tradeoffs Wizard Functions.
- Understand the principles and data requirements to conduct transport asset requirements and movements planning analysis and allocation using the Tradeoffs Wizard Functions.
- Use the ADAMS modules for analysis and to assist in force deployment execution.

5. Qualification

Allied Deployment and Movements System (ADAMS) Advanced User (LOGFAS Vs 6.2)

The qualification is valid for the stated version of the LOGFAS software.

6. Student Criteria

The candidate must:

- Be assigned to a NATO, NATO Nation, Partner Nations and Organisations Headquarters position where the relevant LOGFAS software is or is to be used and applied.
- Meet the stated background knowledge prerequisites.
7. Rank
All ranks and grades that meet the stated Student Criteria.

8. Language Proficiency
In accordance with STANAG 6001: English SLP 3232. The course is conducted in English.

9. Security Clearance
The content and conduct of this course is NATO Unclassified and is Releasable to PFP/MD/ICI/PatG.

10. Course Length
1 Week (5 working days).

11. Special Instructions
None.

12. Class Size
- Maximum: 16 Students
- Recommended: 12 Students
- Minimum: 8 Students

13. Nomination Procedures
In accordance with NCISS instructions. For information go to www.nciss.nato.int

14. Pre-course Study Material
None.

15. Location
The course is normally conducted at NCISS Latina, Italy. However, it can be conducted at other suitable locations.

16. Background Knowledge Prerequisites
The candidate must be able to display and eventually prove theoretical and/or practical skills relating to the deployment of allied forces.

The candidate must have completed the ADAMS Basic Users Course (NCISS Code 224) and have at least six (6) months experience and use of the software.

The candidate must have a basic working knowledge of Microsoft Windows and the common Microsoft Office applications (Word, PowerPoint and Excel).
